

# THE RIGHT PRODUCT FOR YOU

## STM-Stretch

- More holding power, won't re-stretch once applied
- Ability to shrink back to original size after stretch
- Stretches farther to cover pallets with less film
- Manufacturing process allows greater resistance to breaking

### PRODUCT DESCRIPTION

STM Industrial Hand Wrap Stretch Film is linear low-density polyethylene (LLDPE) film. The product is a non-toxic, environmentally friendly, cost-effective transparent film that is easy to use. It has anti-extensibility, puncture, and tear-resistant properties including dustproof, anti-fog, and high viscosity characteristics. It is used in various fields of raw chemical materials, packaging, construction, and load containing on shipping pallets.

### TYPICAL APPLICATIONS

Used for wrapping palletized cartons for load containment and non-unitized loads.

### SPECIFICATIONS

Color: Clear  
 Film Material: LLDPE  
 Total Thickness: 0.600 mil
